

dry'n air

1 Anti-fatigue Sole **AirTech®** + 

with the lowest Profile:

- it removes the "airtight compartment" effect

2 Removable anatomical footbed **dry'n air** with ventilation system:

- higher breathability
- ergonomical and comfortable fitting

a air circulation

b with a built-in system of perforations and ducts creating an air flow between foot and sole, that makes the sweating dispersion easier

3 The low profile sole, combined with the footbed **dry'n air** keep the foot over the shoe edge. The foot is no more boxed in the sole:

- highest breathability and warmth dispersion
